

Acutrade Fabric Laundry Liquid

Acutrade Fabric laundry Liquid is packed full of specific enzymes for the removal of stains in fabrics.

Detergent enzymes are commonly used to remove stains like sweat, oil, grease, food particles etc from clothes. Each type of stain requires a different type of enzyme to be used for preventing damage over the garment. Dirt comes in various forms & it can be cleansed only with chemical detergents that helps to remove stains of any kind.

Advantages of Using Enzyme Detergents:

- Prevents garments from stains even at low temperatures.
- High durable stains can be removed using chemical detergents.
- Prevents any kind of delicate material from stains without damaging the clothes after washing.
- Saves energy & money by using detergents.
- Detergent enzymes are cost-effective and safe to use.

Acutrade Fabric laundry Liquid may be used in multiple washing operations including hand and machine washing. It is a medium to high foaming detergent, ideally suited to multi stage washing machines. It is highly economical with a fraction of conventional detergent needed per kg of laundry, dependent on stain intensity. Acutrade Fabric laundry Liquid is compatible with all types of water, including borehole, salty and hard water. It also improves the removal of oily food soils from fabrics. Acutrade Fabric laundry Liquid can easily be used in cold washes and still achieve outstanding results.

DILUTIONS:

Lightly soiled - 50ml per 10KG
Medium Soiled – 100ml per 10KG
Heavy Soiled - up to 200ml per 10KG

Do not add detergent directly onto garments, this could cause slight staining, add to water intake tray.
